# The Co-op

A co-operative is a kind of company that allows everyone involved to be a co-owner; everyone gets to share in decisions and profits.

We think this "one member, one share, one vote" system is democratic, and supports community in a crucial way.

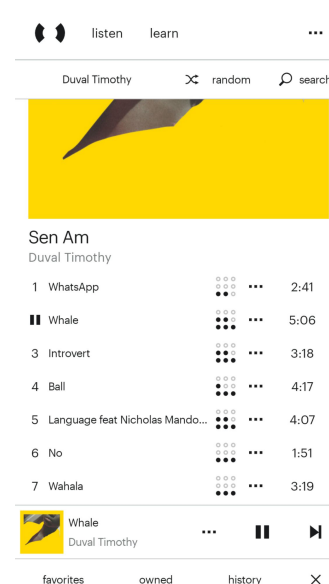

Resonate is a co-op because we believe that everyone should have the opportunity to own their platform, not just mega-rich stars.

Everyone involved has a say in how the company runs.

## Profits

Resonate will share any and all profits with consumers (listeners) and workers (musicians, labels, staff and volunteer contributors).

Members will be able to trade their profits for more streams and downloads and/or withdraw as cash.

## **Resonate is working with the EU to create a ground-breaking Co-operative Privacy and Trust system**

Artists in every field want to collaborate with each other and with their own community-supporting audiences, but trusted collaboration without face to face interaction is hard. It's all too easy to let the major social platforms manage our identity information, even if we'd prefer to work in trusted 'peer-to-peer' circles.

Our Community Credentials project helps communities award simple badge-like credentials that can be proven and recognised across communities.
